Projects

Student Record Management System   Java • OOP Concepts

A Java console application to manage student records with features like add, edit, delete, and view. Demonstrates object-oriented design, exception handling, and file I/O for data persistence.

E-commerce Product Page   HTML • CSS • JavaScript

Ecommerce product page designed to showcase the product. It includes key features such as a product image, detailed product information, color variants, and action buttons for adding to the cart and buying now.

Dynamic Image Slider   HTML • CSS • JavaScript

An image slider with autoplay and navigation arrows. Uses JavaScript to dynamically update content and CSS transitions for smooth animations.

Search Bar   HTML • CSS • JavaScript

A simple search bar with a dropdown menu that allows users to select a specific search field. This can be useful for applications where users need to search within different categories or types of data.
